

August 18, 2006 Update

U.S. 101 Widening Project, Santa Rosa

College Avenue Reconfiguration the week of August 21

- CMS signs have been moved to inform drivers of the reconfiguration of the undercrossing. The reconfiguration will most likely take place Tuesday or Wednesday, August 22 or 23 overnight.
- The new configuration will be in the basic shape of a diamond. Concrete railing will block off the area around the center undercrossing column, moving traffic north and south toward the sides of the undercrossing.
- Turns patterns will remain similar to their current configuration. There will be right turn lanes in both the east and west-bound directions, left turn lanes in both the east and west-bound directions, and a through lane in each direction.

Steele Lane-Overnight Closures the week of August 21

- Steel Lane will be closed next week overnight for crews to construct falsework over the roadway. This work will most likely take place August 23-25, Wednesday through Friday from 9pm to 6am.

Median Work

- The center lanes in both the northbound and southbound directions of U.S. 101 will close Sunday-Tuesday, August 20-22, from 10pm to 5am the following day. The work area will extend from State Route 12 to Steele Lane. Crews will perform work at the median during these closures.

Openings and Closings

- Caltrans will reopen Third Street sometime around the beginning of October, and close Fifth and Ninth Streets shortly after that. Crews will continue with widening work at those locations.

Thank you Santa Rosa for your patience and support!
